Medicine's commitment to keeping our patients, employees, and community safe and informed remains essential. While our clinical staff, faculty, and leadership are constantly adapting to changing circumstances, Stanford Medicine continues to work against the novel coronavirus (COVID-19) pandemic, providing updates and up-to-date information regarding virus prevention, testing, and treatment.

COVID-19 Information

In the media and in weekly virtual forums, our leadership is working to ensure that you have the most accurate and up-to-date information regarding virus prevention and treatment.

Costello. Listen to the podcast.

Take Action - How You Can Help

We are grateful for the expressions of generosity and desire to help coming from across our community. There are various ways in which you can support our immediate emergency response.

• Make a gift

The Stanford Medicine community has reached out in unprecedented ways to offer support for research and caregivers on the frontlines of fighting the COVID-19 pandemic. In response, we have expanded the creation of new funds to aid in advancing clinical care and research. Learn more.

• Give blood or plasma

The Stanford Blood Center urges those who are healthy, and who haven’t been in contact with someone who has COVID-19, to make urgently needed blood donations.

Learn more.

• Participate in COVID-19 research

Are you a recovered COVID-19 patient? If so, you may qualify to participate in Stanford’s Convalescent Plasma Donation Program to help critically ill COVID-19 patients. Learn more.

Are you a recovered COVID-19 patient? If so, you may qualify to participate in Stanford’s Convalescent Plasma Donation Program to help critically ill COVID-19 patients. Learn more.

• Take part in National Daily Health Survey for Novel Coronavirus

A large-scale study is recruiting volunteers to take part in a daily health survey for several weeks. This will help researchers learn how COVID-19 is spreading in the U.S. and inform future strategies. Learn more.

• Tell a frontline caregiver that you care

Learn more.

• Test for antibodies against novel coronavirus developed

A small test that reveals information about a person’s immune response to an infection is now available to the public.

Learn more.

• Take part in COVID-19 research

Learn more.

• Join thousands of individuals from the United States and around the world who have participated in a Stanford-led research study to help understand the social and behavioral impact of the evolving COVID-19 pandemic.
